

CONDUCTING A SELF AUDIT OF YOUR SAFETY PROGRAM

LEE T. FORTIER CSP

OSHA'S EXPECTATIONS

- Management Commitment and Employee Involvement
- Worksite Analysis
- Hazard Prevention & Control
- Safety & Health Training

MANAGEMENT COMMITMENT & EMPLOYEE INVOLVEMENT

- Develop a worksite safety & health policy
- Establish & communicate safety/ health related goals
- Provide visible top management involvement & support
- Encourage employee involvement

MANAGEMENT COMMITMENT & EMPLOYEE INVOLVEMENT (CONT)

- Assign & communicate program responsibility
- Provide adequate authority and resources
- Hold managers, supervisors, and employees accountable
- Review program regularly

WORKSITE ANALYSIS RECOMMENDED ACTIONS

- Identify hazards
- Provide regular inspections
- Encourage input from employees
- Investigate accidents/near misses
- Analyze injury/illness trends

HAZARD PREVENTION & CONTROL RECOMMENDED ACTIONS

- Establish hazard control procedures
- Provide regular maintenance
- Implement an emergency action plan
- Establish a medical program
- Provide PPE
- Establish a disciplinary system with documentation

START WITH YOUR PROGRAM

- Keep it as brief and concise as possible.
- Stated goals? (zero accidents)
- Top Management support?
 - Can you quantify that?
- Assigned responsibilities to all levels?
- Safety have a budget?
- Is safety a part of annual reviews?
- Updated? No MSDS

SAFETY PROGRAM (CONTINUED)

- Are you doing annual reviews?
 - Lockout Tagout
 - Confined Space
 - Respirators
 - PPE Assessment

WORKSITE ANALYSIS

- Does your program address your operations, or are you using a generic program?
- How do you document your inspections?
- Do you get input from employees?
 - Safety Committee?
 - Good safety climate?
- Conduct formal accident investigations?
- Review accident and first aid logs?

HAZARD PREVENTION & CONTROL

- Develop safety rules that are specific to your operations.
 - Don't rewrite the OSHA Standards.
- Does each site have an Emergency Action Plan?
 - Certified first aid/CPR providers?
 - First aid supplies/AED?
- Good PPE assessment with extra PPE?
- Disciplinary action program?
 - If not, you have a “paper program.”

TRAINING

- Almost every standard has a training requirement
- Employees must be trained in the recognition and avoidance of unsafe conditions. 1926.21(b)(2)
- Conducted with new hires
- Weekly safety **training** meetings
- Assure retention of materials

TRAINING HELPS PREVENT ACCIDENTS

- 25% of accidents occur in the first 30 days of employment
- 32% occur within the first year

HOW DO YOU KNOW IF YOUR TRAINING IS EFFECTIVE?

- Training means that students actually learned something
- Sign in sheets don't mean they learned anything
- Training should be measured
 - Tests
 - Observations
- OSHA will ask employees questions. If they can't answer, they weren't trained.

SELF INSPECTION

- Review OSHA's top 10 cited standards (General Industry and Construction)
 - Falls
 - Respirators
 - Ladders
 - HAZCOM
 - Scaffolding
 - Fall Protection training
 - Lockout
 - Eye and face protection
 - Powered Industrial Trucks
 - Machine Guarding

OTHER COMMONLY CITED ISSUES

- Extension cords
- Blocked panels
- Fire extinguisher inspections and training
- OSHA recordkeeping (300A posted)
- PPE Assessment

GET A SECOND OPINION

- Anyone can miss something.
 - Have another safety professional conduct an inspection.
 - Hire a consultant to conduct an audit.

THANK YOU FOR YOUR ATTENTION
